Capital Investors

By LAURA HOBSON

Imagine becoming a Capitalist for forty down and forty a month!

It would take plenty of patience, but right off you'd begin to own common stock and become an investor in American industry.

Laura Hobson

It's no more of a fairy tale than becoming a car owner for so much down and so much a month, or buying a TV set, washing machine, refrigerator or tractor on the installment plan.

For a long time the N.Y. Stock Exchange has been the clearing house for ideas about installment investing, and now at last the first perfected method goes into operation on Jan. 25, 1954.

-:-

IT WAS DEVELOPED by two leading dealers in odd-lot shares, Carlisle and Jacquelin of 120 Broadway, and De Coppet and Doremus of 63 Wall Street. It's different from established "mutual funds" plans where you also send in a fixed sum per month, because in those, the selection of stocks is made for you, not by you.

With this new plan, you not only get installment-buying, you get flexibility and free enterprise.

Once you've decided whether to pay in quarterly or monthly periods, and in what amount between $40 and $1,000, you then select the stock or stocks you believe in.

Your broker, a member firm of the N.Y. Stock Exchange, takes your order and your payment, and next morning he buys you one or more shares at the going price — in Wall Street parlance, "At the Market."

-:-

IF YOUR PAYMENT is $40 and your pet stock is quoted at $30, he'll buy you about one and a third shares, using the full $40 minus the regular broker's commission. In three months, you'd own four full shares.

You're not going into debt, or buying on margin, or any of those unsound things, because your broker buys only as much as you've actually paid for.

You can sign on for a year or five years — but what you sign is not a contract, merely an indication of intent. Which is good for you, because if you fall by the wayside halfway through the term agreed on, nobody can sue you.

Nor can anybody "repossess" the shares you've paid for. Nobody can come around, unlock the doors of your garage and drive your American Tel and Tel or Douglas Aircraft right out from under your nose.

-:-

IF IN TIME you become a great market dopester, and feel in your bones that it's time to dump shares, you can direct your broker to unload, and either hold the proceeds for future investment or turn them over to you.

As for dividend checks—if any—they'll be mailed to you or entered to your account—whichever you say.

In other words, Mr. Capitalist, your decision is final.

There's nothing new about "The Common People" owning common stocks in America — 6,700,000 of us do just that. That fabulous figure includes office and factory workers, teachers, salesmen, farmers, shopkeepers and assorted other citizens in the medium to lower income brackets.

Now this new plan might let several million more of us into the nice green pastures of capital investment.

Even thinking about signing up next month has changed my daily life. Every morning when the paper comes, I turn straight to the stock market page.

You've no idea how my pulse speeds up, nor how free and enterprising I feel.

"The Robe" Held Over Here Through Sunday

"The Robe," the widely - acclaimed first movie to be produced in CinemaScope, is being held over at the State Theater through Sunday.

Its 11-day run makes it the longest period for which any movie has been kept in Salem.

The movie stars Victor Mature, Jean Simmons and Richard Burton in a story based on Lloyd Douglas's best-selling novel of the same name.

Pictured in technicolor on the State's new wide screen, the movie presents the story of the crucifixion of Christ and the soldiers who gambled for his Robe after his death and its effect on their lives.

Questions, Answers

Q — What is the history behind the present name of Wall Street in New York City?

A — When the Dutch settled New York, a wall was built on the northern boundary of the village. This ran the same way that Wall Street does now.

Q — When a train goes forward does its smoke go backwardb

A — No. The smoke is going in the same direction as the train, but so much more slowly that it does its smoke go backward?
